Knowledge Factor, Inc. Celebrates Its 8th Anniversary

Denver, May 22, 2009 – Knowledge Factor, Inc. is celebrating its 8th anniversary this week as the company cements its position as the leader in Confidence-Based Learning solutions.

Knowledge Factor's combination of services, consulting methods and Web-based solutions enable organizations to achieve their business objectives by providing data, metrics and intelligence about their people's level of competence that they can't get anywhere else. Transforming how competence is assessed, delivered and measured, translates to better people performance, improved customer experience and enhanced organizational outcomes. Proven to optimize and complement training and development programs, Knowledge Factors' products increase an organization's ability to meet productivity, compliance and quality goals.

Incorporated on May 22, 2001, Knowledge Factor remains focused on driving productivity and results within organizations with its Confidence-Based Learning, Confidence-Based Diagnostic and Off-the-shelf Content offerings. All of the company's solutions are fueled by a patented methodology based in 70 years of research into the connection between confidence, correctness, retention and learning.

"The company's founders and initial leadership team provided the vision and technology platform for our unique solutions. We now look forward to partnering with industry leaders to rapidly implement our unique learning solutions and drive improved business outcomes," stated Larry Gray, Knowledge Factor's President & Chief Executive Officer.

Knowledge Factor has successfully implemented solutions in Fortune 500 companies and private companies throughout a variety of industries, as well as professional associations and universities throughout the world. Knowledge Factor is based in Denver, Colorado.
